INTRO & EDUCATION

Second-year **Computer Science (AI & ML)** student passionate about building real-world tech solutions. Built **QuickSketch**, an AI-powered sketch recognition application achieving **95.6% validation accuracy** with a custom CNN architecture, alongside an AI-driven placement prep platform. Focused on Python, deep learning, and intelligent systems — always eager to learn, build, and grow.

B.Tech in Computer Science (AI & ML) *(2025 – Present)*

Pimpri Chinchwad College of Engineering, Pune | CGPA: 8.32

TECHNICAL SKILLS

Languages & Core	Python, HTML, CSS, JavaScript (Basics), MATLAB
AI & Data Science	Machine Learning, Data Science, Artificial Intelligence, Pandas, NumPy, Matplotlib
Computer Science	Object-Oriented Programming (OOP), Data Structures & Algorithms (DSA)
Tools & Tech	Git, GitHub, API Integration

KEY PROJECTS

MemoryVerse AI *(Jul 2026)*

Link: github.com/madhavzanwar/memoryverse-ai

- Built an **AI-driven digital-identity platform** to automatically ingest and process uploaded documents (PDF/TXT/DOCX)
- Classified documents intelligently and extracted **key metadata** (titles, dates, skills, summaries) to generate a chronological timeline
- Developed a **relationship engine** to map connections across documents and enabled semantic search via **plain-English queries** powered by LLM reasoning

QuickSketch – AI Sketch Recognition App *(May 2026)*

Link: github.com/madhavzanwar/quicksketch

- Designed and trained a **custom CNN** classifying 16 sketch categories with **95.6% validation accuracy**
- Built a lightweight ~**392K-parameter** deep learning model optimized for fast, real-time inference
- Deployed a full-stack app with a **Flask backend** on Railway and a live **GitHub Pages frontend**
- Delivered a user-friendly drawing canvas enabling instant, interactive **sketch-to-prediction results**

Placement AI – AI-Powered Placement Prep Platform *(Mar 2026)*

Link: github.com/madhavzanwar/placement-ai

- Built **resume parsing**, placement readiness scoring, and **personalized improvement suggestions**
- Implemented a **mock interview system** with behavioral and technical questions
- Designed a dashboard tracking skill coverage with a **structured learning roadmap**
- Built using Python (Flask), HTML, CSS, and JavaScript with **scalable AI integration**

PCA Face Recognition – MATLAB *(Nov 2025)*

Link: github.com/madhavzanwar/PCA-Face-Recognition-MATLAB

- Implemented **Eigenfaces-based recognition** with mean face computation and feature extraction
- Achieved **93.75% accuracy** on the ORL dataset, demonstrating practical computer vision skills
- Applied **dimensionality reduction** and face reconstruction for efficient recognition

OTHER PROJECTS

MathLab – Interactive Calculus Platform *(May 2026)*

Link: github.com/madhavzanwar/interactive-definite-integration-lab

- Developed an educational tool to dynamically visualize **bounded regions** and iterated integrals for double integration
- Facilitated the exploration of inner and outer integration limits through **interactive diagrams**
- Generated **step-by-step solutions** to multivariable integration problems within an NTA-style practice environment

TraceGuard – AI-Powered Expense Tracker *(Apr 2026)*

Link: github.com/madhavzanwar/hack-carnival-TraceGuard

- Developed an expense-tracking application featuring **automated AI expense categorization** and budget management tools
- Tracked real-time spending through an interactive, visually responsive **dark-themed dashboard**
- Generated **monthly spending analytics** and visual charts to help users improve financial habits

Car Parking System *(Oct 2025)*

- Created a **Python/Streamlit web application** for comprehensive parking lot management
- Tracked entry/exit logging, slot availability, and **real-time status updates**

Woman Safety Band *(Sep 2025)*

- Designed an **IoT wearable safety device** prototype to detect distress signals via button press, sensors, or voice/gestures
- Integrated a **GPS module** to capture real-time location and send instant emergency alerts to pre-registered contacts

CERTIFICATIONS & COURSES

- **GenAI Battle Arena 2026 – Winning Position** | *Unstop* *(Jul 2026)*
- **Intro to Machine Learning** | *Kaggle* *(Jul 2026)*
- **Problem Solving (Intermediate)** | *HackerRank* *(Jun 2026)*
- **Prompting Essentials & AI Partner Specializations** | *Google (Coursera)* *(Jun 2026)*
- **Speed Up Data Analysis and Presentation Building** | *Google (Coursera)* *(May 2026)*
- **Flutter Development Workshop** | *PCCOE* *(Feb 2026)*
- **Claude Certifications** (Building with API, MCP) | *Anthropic* *(2026)*

POSITIONS OF RESPONSIBILITY

Event Volunteer *(Mar 2026)*

Spectrum 2026, PCCOE

- Contributed to the successful organization of Spectrum 2026, a college-level technical and cultural event
- Guided and assisted participants, managing registrations, **data collection** and on-site verification

ACTIVITIES & ACHIEVEMENTS

- **Competitive Programming:** Solved over **300 problems** on LeetCode (leetcode.com/u/madhav_builds/) across arrays, strings, recursion, and dynamic programming to build strong DSA fundamentals
- **Open Source Contributor:** Selected as a participant and active contributor for both the **GirlScript Summer of Code 2026** and the **IEEE Summer of Code 2026** initiatives
- **Reading Competition (PCCOE):** Secured **2nd place** and a ₹2000 cash prize in a college-wide reading competition; improved communication clarity and developed consistent reflection habits
- **Spectrum Treasure Hunt Winner:** Part of the winning team in the campus "Spectrum" treasure hunt event; awarded a **₹4000 prize**
- **Hack Carnival 2026 Participant:** Selected in the final round for building TraceGuard within a competitive hackathon environment, demonstrating **teamwork, rapid prototyping**, and end-to-end product development under time pressure
